Arora and Associates developed the Conceptual Master Plan for the **Cleona Community Park**. This park is intended to provide improved and additional recreational opportunities for local residents and residents of surrounding neighborhoods. The plan includes an environmental observation and education area to protect the important natural resources. This plan was developed to support applications for implementation funds.

The Conceptual Master Plan identifies the opportunity to tie together a recreation area with the proposed greenway along the Quittapahilla Creek corridor. This would enable a future connection to the corridor and neighboring Townships. Arora is assisting Cleona Borough in their efforts to preserve and enhance the Quittapahilla Creek Corridor while introducing passive recreation.
