Arora and Associates is providing professional services to Washington County for design of the Panhandle Trail Project, which runs along the abandoned Conrail Line. Arora is responsible for design and preparation of construction documents for the east section of this approximately 17-mile long rail-trail traversing the Panhandle Historic district in the northern tier of the county.

Trail travels both over and under a number of historic structures.

The Panhandle trail will pass under the Montour Trail at the McDonald Trestle. A connector linking the two trails is planned. Major design elements include trail alignment and surface, landscaping and plantings, stormwater management facilities, at-grade road crossings, structural assessment and design, trailhead/contact areas and utility coordination.

Arora is responsible for the trail design and alignments, development of erosion and sediment pollution control, signage and pavement marking, and maintenance and protection of traffic plans. Arora is also responsible for assisting in project permitting efforts, participation in public meetings and outreach, and providing consultation services during construction.

Outreach and inclusion of local residents included as part of the planning process.
